INDEX TO AUTHORS

AJL, SAMUEL J. Studies on the mechanism of acetate oxidation by bacteria. VI. Comparative patterns of acetate oxidation by citrate-grown and acetate-grown *Aerobacter aerogenes*, 119

ALLFREY, V., and MIRSKY, A. E. The incorporation of N^{15}-glycine by avian erythrocytes and reticulocytes *in vitro*, 841

—, STERN, H., MIRSKY, A. E., and SAETREN, H. The isolation of cell nuclei in non-aqueous media, 529

—. See STERN, ALLFREY, MIRSKY, and SAETREN, 559

ANDERSON, JOHN D. Galvanotaxis of slime mold, 1

ANDERSON, NORMAN G., and WILBUR, KARL M. Studies on isolated cell components. IV. The effect of various solutions on the isolated rat liver nucleus, 781

ANDERSON, THOMAS F., and DOERMANN, A. H. The intracellular growth of bacteriophages. II. The growth of T3 studied by sonic disintegration and by T6-cyanide lysis of infected cells, 657

ANDREWS, J. R. See SCHOLANDER, CLAFF, ANDREWS, and WALLACH, 375

BAER, B. S., and KRUEGER, A. P. The *B. mycoides* N host-virus system. I. Differences in appearance and "rate of growth" of the lysogenic and parent indicator strains, 857

BARRON, E. S. GUZMAN, and SEKI, S. LOUISE. Studies on the mechanism of action of ionizing radiations. VII. Cellular respiration, cell division, and ionizing radiations, 865

BLUM, HAROLD F., ROBINSON, J. COURTLAND, and LOOS, GORDON M. The loci of action of ultraviolet and x-radiation and of photorecovery in the egg and sperm of the sea urchin *Arbacia punctulata*, 323

BOZLER, EMIL. The effect of electrolytes on the contractile elements of muscle, 703

BRIGGS, ROBERT. An analysis of the inactivation of the frog sperm nucleus by toluidine blue, 761

BROWN, PAUL K. See WALD and BROWN, 797

CALDAS, LUIS RENATO. See LATARJET and CALDAS, 455

CHAMAILLARD, LILIANE. See LATARJET and CALDAS, 455

CHEN, HELEN L., and COLLIER, H. BRUCE. The action of some hemolysis accelerators upon lipid and protein monolayers, 17

CLAFF, C. LLOYD. See SCHOLANDER, CLAFF, ANDREWS, and WALLACH, 375

COLLIER, H. BRUCE. Factors affecting the hemolytic action of "lysolecithin" upon rabbit erythrocytes, 617

—. See CHEN and COLLIER, 17

COMMONER, BARRY, and DIETZ, PHYLLIS M. Changes in non-protein nitrogen metabolism during tobacco mosaic virus biosynthesis, 847

COOPER, OCTAVIA. See SCHOLANDER, CLAFF, ANDREWS, and WALLACH, 375

COX, R. T. See PONDER and COX, 595

DETHIER, V. G. The limiting mechanism in tarsal chemoreception, 55
— and YOST, M. T. Olfactory stimulation of blowflies by homologous alcohols, 823
DIETZ, PHYLLIS M. See COMMONER and DIETZ, 847
DOERMANN, A. H. The intracellular growth of bacteriophages. I. Liberation of intracellular bacteriophage T4 by premature lysis with another phage or with cyanide, 645
—. See ANDERSON and DOERMANN, 657

FOSTER, J. W. See HARDWICK and FOSTER, 907
FRENCH, C. S., and YOUNG, VIOLET K. The fluorescence spectra of red algae and the transfer of energy from phycoerythrin to phycocyanine and chlorophyll, 873

GALLEGO, A. Loss and recovery of excitability by normal and by degenerating nerves deprived of sodium, 129
— and LORENTE DE NÓ, R. On the effect of ammonium and lithium ions upon frog nerve deprived of sodium, 227
GRAFF, JACK. See HOBERMAN, METZ, and GRAFF, 639
GREGERMAN, ROBERT I. Adrenalin and hydroxytyramine in the parotid gland venom of the toad, *Bufo marinus*, 483
— and WALD, GEORGE. The alleged occurrence of adrenalin in the mealworm, 489

— and RIGGS, AUSTEN. The hemoglobin of the sea lamprey, *Petromyzon marinus*, 45
—. See GREGERMAN and WALD, 489

WALLACH, D. F. See SCHOLANDER, CLAFF, ANDREWS, and WALLACH, 375
WILBUR, KARL M. See ANDERSON and WILBUR, 781
WILLIAMS, CARROLL M. See PAPPENHEIMER and WILLIAMS, 727

YOST, M. T. See DETHIER and YOST, 823
YOUNG, VIOLET K. See FRENCH and YOUNG, 873

INDEX TO SUBJECTS

ACETATE oxidation, mechanism, by citrate-grown and acetate-grown *Aerobacter aerogenes*, comparative patterns, 119

Acid, desoxyribonucleic, ribonucleic acid, and protein synthesis in uninfected *Staphylococcus muscae* cultures, 741

—, ribonucleic, bacterial, release, virus synthesis, virus liberation, and cellular lysis, relationship in bacteriophage formation in *Staphylococcus muscae* cultures, 409

—, ribonucleic, desoxyribonucleic acid, and protein synthesis in uninfected *Staphylococcus muscae* cultures, 741

Adrenalin, alleged occurrence in mealworm, 489

— and hydroxytyramine in parotid gland venom of toad, *Bufo marinus*, 483

Aerobacter aerogenes, citrate-grown and acetate-grown, comparative patterns of acetate oxidation by, 119

Aerobic bacteria, nature of sporogenesis in, 907

After-currents, after-potentials, excitability, and ventral root electrotonus in spinal motoneurons, 289

After-potentials, after-currents, excitability, and ventral root electrotonus in spinal motoneurons, 289

Albumin, ov-, and plakalbumin, enzymatic dephosphorylation, 711

—, plak-, and ovalbumin, enzymatic dephosphorylation, 711

Alcohols, homologous, olfactory stimulation of blowflies by, 823

Algae, red, fluorescence spectra, and transfer of energy from phycoerythrin to phycocyanine and chlorophyll, 873

Ammonium and lithium ions, effect upon frog nerve deprived of sodium, 227

Anguilla rostrata, hemoglobin, oxygen equilibrium, [illegible]41

Arbacia eggs, fertilized and unfertilized, suspended in heavy water, uptake of deuterium into proteins of, 639

— *punctulata*, egg and sperm, loci of action of ultraviolet and x-radiation and of photorecovery in, [illegible] 323

Avian erythrocytes and reticulocytes, incorporation of radioactive nitrogen-labelled glycine *in vitro* by, 841

BACILLUS *megatherium*, infection, growth, lysis, and bacteriophage production, effect of various culture media on, 471

— *mycoides* N host-virus system, lysogenic and parent indicator strains, differences in appearance and rate of growth, 857

Bacteria, *Aerobacter aerogenes*, citrate-grown and acetate-grown, comparative patterns of acetate oxidation by, 119

—, aerobic, nature of sporogenesis in, 907

—, uninfected, protein in, ribonucleic acid, and desoxyribonucleic acid, synthesis in *Staphylococcus muscae* cultures, 741

—, uninfected, ribonucleic acid, desoxyribonucleic acid, and protein in, synthesis in *Staphylococcus muscae* cultures, 741

Bacterial ribonucleic acid, release, virus synthesis, virus liberation, and cellular lysis, relationship in bacteriophage formation in *Staphylococcus muscae* cultures, 409
Bacteriophage formation in *Staphylococcus muscae* cultures, relationship between virus synthesis, release of bacterial ribonucleic acid, virus liberation, and cellular lysis, 409
— formation in *Staphylococcus muscae* cultures, synthesis of ribonucleic acid, desoxyribonucleic acid, and protein in uninfected bacteria, 741
— production, infection, growth, and lysis of *Bacillus megatherium*, effect of various culture media on, 471
Bacteriophages, intracellular growth, liberation of intracellular bacteriophage T4 by premature lysis with another bacteriophage or with cyanide, 645
—, intracellular growth, T3 studied by sonic disintegration and by T6-cyanide lysis of infected cells, 657
Bleaching, rhodopsin, interplay of light and heat in, 495
— and synthesis of rhodopsin, role of sulfhydryl groups, 797
Blood cell, red. *See* Erythrocyte.
— and tissues, separation and assay of lysins and lysin-inhibitor complexes in, 361
Blowflies, olfactory stimulation by homologous alcohols, 823
Bufo marinus, parotid gland venom, adrenalin and hydroxytyramine in, 483

CARBON dioxide production and oxygen consumption by cells and enzymic reactions, methods for measuring, 375
Catalase in irradiated microorganisms, restoration induced by, 455
Cecropia silkworm, effects of diphtheria toxin on, 727
Cell, blood, red. *See* Erythrocyte.
— components, isolated, effect of various solutions on isolated rat liver nucleus, 781
— division, cellular respiration, and ionizing radiations, 865
—, human, red, mechanism of glucose transfer into and out of, 891
— nuclei in non-aqueous media, isolation, 529
Cells and enzymic reactions, methods for measuring oxygen consumption and carbon dioxide production by, 375
—, infected, growth of T3 studied by sonic disintegration and by T6-cyanide lysis of, 657
—, living, mechanism of accumulation in, 579
Cellular lysis, virus synthesis, release of bacterial ribonucleic acid, and virus liberation, relationship in bacteriophage formation in *Staphylococcus muscae* cultures, 409
— respiration, cell division, and ionizing radiations, 865
Centrifuge, ultra-, electrophoresis, and viscosity studies on crystalline pyrophosphatase, 451
Chemical, physico-, characterization of pituitary follicle-stimulating hormone, 629
Chemoreception, tarsal, limiting mechanism in, 55
Chlorophyll and phycocyanine, fluorescence spectra of red algae and transfer of energy from phycoerythrin to, 873
Citrate-grown and acetate-grown *Aerobacter aerogenes*, comparative patterns of acetate oxidation by, 119
Cocaine, effect upon sodium-deficient frog nerve, 203
Conduction, continuous, of impulses in peripheral myelinated nerve fibers, 343
—, impulse, in spinal motoneurons, electrical signs of, 255

Contractile elements of muscle, effect of electrolytes, 703
Crystalline inorganic pyrophosphatase isolated from bakers' yeast, 423
— pyrophosphatase, ultracentrifuge, electrophoresis, and viscosity studies on, 451
Cultivation media, effect on infection, growth, lysis, and bacteriophage production of *Bacillus megatherium*, 471
— of *Staphylococcus muscae*, bacteriophage formation, relationship between virus synthesis, release of bacterial ribonucleic acid, virus liberation, and cellular lysis, 409
— of *Staphylococcus muscae*, bacteriophage formation, synthesis of ribonucleic acid, desoxyribonucleic acid, and protein in uninfected bacteria, 741
Cyanide, liberation of intracellular bacteriophage T4 by premature lysis with another bacteriophage or with, 645
Cyanide-T6 lysis of infected cells, and sonic disintegration, growth of T3 studied by, 657
Cytochrome *c* oxidase of house fly, *Musca domestica* L., 397

DEGENERATION, loss and recovery of excitability by nerves deprived of sodium, 129
Dephosphorylation, enzymatic, of ovalbumin and plakalbumin, 711
Desoxyribonucleic acid, ribonucleic acid, and protein synthesis in uninfected *Staphylococcus muscae* cultures, 741
Deuterium, uptake into proteins of fertilized and unfertilized *Arbacia* eggs suspended in heavy water, 639
Diphtheria toxin, effects on *Cecropia* silkworm, 727

EEL, *Anguilla rostrata*, hemoglobin, oxygen equilibrium, 41
Egg and sperm of sea urchin *Arbacia punctulata*, loci of action of ultraviolet and x-radiation and of photorecovery in, 323
Eggs, *Arbacia*, fertilized and unfertilized, suspended in heavy water, uptake of deuterium into proteins of, 639
—, sea urchin, solubility changes of proteins upon fertilization, 245
Electrical signs of impulse conduction in spinal motoneurons, 255
Electrolytes, effect on contractile elements of muscle, 703
Electrophoresis of proteins on filter paper, 89
—, ultracentrifuge, and viscosity studies on crystalline pyrophosphatase, 451
Electrotonus, ventral root, after-currents, after-potentials, and excitability in spinal motoneurons, 289
Energy transfer from phycoerythrin to phycocyanine and chlorophyll, and fluorescence spectra of red algae, 873
Enzymatic dephosphorylation of ovalbumin and plakalbumin, 711
Enzymes of isolated nuclei, 559
Enzymic reactions and cells, methods for measuring oxygen consumption and carbon dioxide production by, 375
Erythrocyte ghosts, permeability properties, 669
—, human, mechanism of glucose transfer into and out of, 891
Erythrocytes, human, delayed hemolysis in solutions of glucose, 605
—, rabbit, factors affecting hemolytic action of lysolecithin upon, 617
— and reticulocytes, avian, incorporation of radioactive nitrogen-labelled glycine *in vitro* by, 841
Excitability, after-currents, after-po-

tentials, and ventral root electrotonus in spinal motoneurons, 289
Excitability, loss and recovery by normal and by degenerating nerves deprived of sodium, 129

FERTILIZATION, solubility changes of proteins in sea urchin eggs upon, 245
Fertilized and unfertilized *Arbacia* eggs suspended in heavy water, uptake of deuterium into proteins of, 639
Fibers, nerve, peripheral myelinated, continuous conduction of impulses in, 343
Filter paper, electrophoresis of proteins on, 89
Fluorescence spectra of red algae and transfer of energy from phycoerythrin to phycocyanine and chlorophyll, 873
Fly, house, *Musca domestica* L., cytochrome *c* oxidase, 397
Follicle-stimulating hormone, pituitary, physicochemical characterization, 629

GALVANOTAXIS of slime mold, 1
Gland, parotid, venom, of toad, *Bufo marinus*, adrenalin and hydroxytyramine in, 483
Globulin, plasma, fractionation for prothrombin, thrombokinase, and accessory thromboplastin, 67
Glucose solutions, delayed hemolysis of human erythrocytes in, 605
— transfer into and out of human red cell, mechanism, 891
Glycine labelled with radioactive nitrogen, incorporation by avian erythrocytes and reticulocytes *in vitro*, 841

HEAT and light, interplay in bleaching rhodopsin, 495
Heavy water, uptake of deuterium into proteins of fertilized and unfertilized *Arbacia* eggs suspended in, 639
Hemoglobin, eel, *Anguilla rostrata*, oxygen equilibrium, 41
— metamorphosis in bullfrog, 23
— of sea lamprey, *Petromyzon marinus*, 45
Hemolysis accelerators, action upon lipid and protein monolayers, 17
— considered as progressive reaction in heterogeneous system, 595
—, delayed, of human erythrocytes in solutions of glucose, 605
Hemolytic action of lysolecithin upon rabbit erythrocytes, factors affecting, 617
Homologous alcohols, olfactory stimulation of blowflies by, 823
Hormone, follicle-stimulating, pituitary, physicochemical characterization, 629
Host-virus system, *Bacillus mycoides* N, lysogenic and parent indicator strains, differences in appearance and rate of growth, 857
Hydroxytyramine and adrenalin in parotid gland venom of toad, *Bufo marinus*, 483

IMPULSE conduction in spinal motoneurons, electrical signs of, 255
Impulses in peripheral myelinated nerve fibers, continuous conduction of, 343
Ionizing radiations, mechanism of action, cellular respiration, cell division, and, 865
Ions, ammonium and lithium, effect upon frog nerve deprived of sodium, 227
—, sodium, different external concentrations, equilibria of frog nerve with, 145
Irradiated microorganisms, restoration induced by catalase in, 455

LAMPREY, sea, *Petromyzon marinus*, hemoglobin, 45

Light and heat, interplay in bleaching rhodopsin, 495
Lipid and protein monolayers, action of hemolysis accelerators upon, 17
Lithium and ammonium ions, effect upon frog nerve deprived of sodium, 227
Liver nucleus, rat, isolated, effect of various solutions, 781
Lysin-inhibitor complexes and lysins in blood and tissues, separation and assay, 361
Lysins and lysin-inhibitor complexes in blood and tissues, separation and assay, 361
Lysis, cellular, virus synthesis, release of bacterial ribonucleic acid, and virus liberation, relationship in bacteriophage formation in *Staphylococcus muscae* cultures, 409
—, infection, growth, and bacteriophage production of *Bacillus megatherium*, effect of various culture media on, 471
—, premature, with another bacteriophage or with cyanide, liberation of intracellular bacteriophage T4 by, 645
—, T6-cyanide, of infected cells, and sonic disintegration, growth of T3 studied by, 657
Lysogenic and parent indicator strains of *Bacillus mycoides* N host-virus system, differences in appearance and rate of growth, 857
Lysolecithin, hemolytic action upon rabbit erythrocytes, factors affecting, 617

MAN, erythrocytes, delayed hemolysis in solutions of glucose, 605
—, red cell, mechanism of glucose transfer into and out of, 891
Mealworm, alleged occurrence of adrenalin in, 489
Media, culture, effect on infection, growth, lysis, and bacteriophage production of *Bacillus megatherium*, 471
Media, non-aqueous, isolation of cell nuclei in, 529
Metabolism, non-protein nitrogen, changes during tobacco mosaic virus biosynthesis, 847
Metamorphosis of hemoglobin in bullfrog, 23
Microorganisms, irradiated, restoration induced by catalase in, 455
Microvolumetric respirometry, methods for measuring oxygen consumption and carbon dioxide production by cells and enzymic reactions, 375
Mold, slime, galvanotaxis, 1
Mosaic virus, tobacco, biosynthesis, changes in non-protein nitrogen metabolism during, 847
Motoneurons, spinal, after-currents, after-potentials, excitability, and ventral root electrotonus in, 289
—, spinal, electrical signs of impulse conduction in, 255
Musca domestica L., cytochrome *c* oxidase, 397
Muscle, contractile elements, effect of electrolytes on, 703
Myelinated nerve fibers, peripheral, continuous conduction of impulses in, 343

NERVE fibers, peripheral myelinated, continuous conduction of impulses in, 343
—, frog, deprived of sodium, effect of ammonium and lithium ions upon, 227
—, frog, equilibria with different external concentrations of sodium ions, 145
—, frog, sodium-deficient, effect of cocaine, 203
Nerves, normal and degenerating, deprived of sodium, loss and recovery of excitability by, 129
Nitrogen, non-protein, metabolism, changes during tobacco mosaic virus biosynthesis, 847
—, radioactive, glycine labelled with,

incorporation by avian erythrocytes and reticulocytes *in vitro*, 841
Nuclei, cell, in non-aqueous media, isolation, 529
—, isolated, enzymes of, 559
Nucleic acid, desoxyribo-, ribonucleic acid, and protein synthesis in uninfected *Staphylococcus muscae* cultures, 741
— acid, ribo-, bacterial, release, virus synthesis, virus liberation, and cellular lysis, relationship in bacteriophage formation in *Staphylococcus muscae* cultures, 409
— acid, ribo-, desoxyribonucleic acid, and protein synthesis in uninfected *Staphylococcus muscae* cultures, 741
Nucleus, liver, rat, isolated, effect of various solutions, 781
—, sperm, frog, analysis of inactivation by toluidine blue, 761

OLFACTORY stimulation of blowflies by homologous alcohols, 823
Ovalbumin and plakalbumin, enzymatic dephosphorylation, 711
Oxidase, cytochrome *c*, of house fly, *Musca domestica* L., 397
Oxidation, acetate, mechanism, by citrate-grown and acetate-grown *Aerobacter aerogenes*, comparative patterns, 119
Oxygen consumption and carbon dioxide production by cells and enzymic reactions, methods for measuring, 375
— equilibrium of hemoglobin of eel, *Anguilla rostrata*, 41

PAPER, filter, electrophoresis of proteins on, 89
Parotid gland venom of toad, *Bufo marinus*, adrenalin and hydroxytyramine in, 483
Permeability properties of erythrocyte ghosts, 669
Petromyzon marinus, hemoglobin, 45
Phage. *See* Bacteriophage.
Phosphatase, pyro-, crystalline inorganic, isolated from bakers' yeast, 423
—, pyro-, crystalline, ultracentrifuge, electrophoresis, and viscosity studies on, 451
Photorecovery and ultraviolet and x-radiation, loci of action in egg and sperm of sea urchin *Arbacia punctulata*, 323
Phycocyanine and chlorophyll, fluorescence spectra of red algae and transfer of energy from phycoerythrin to, 873
Phycoerythrin, transfer of energy from to phycocyanine and chlorophyll, and fluorescence spectra of red algae, 873
Physicochemical characterization of pituitary follicle-stimulating hormone, 629
Pituitary follicle-stimulating hormone, physicochemical characterization, 629
Plakalbumin and ovalbumin, enzymatic dephosphorylation, 711
Plasma globulin, fractionation for prothrombin, thrombokinase, and accessory thromboplastin, 67
Potentials, after-, after-currents, excitability, and ventral root electrotonus in spinal motoneurons, 289
Protein and lipid monolayers, action of hemolysis accelerators upon, 17
—, non-, nitrogen metabolism during tobacco mosaic virus biosynthesis, changes in, 847
— synthesis, ribonucleic acid, and desoxyribonucleic acid in uninfected *Staphylococcus muscae* cultures, 741
Proteins, electrophoresis on filter paper, 89
— in sea urchin eggs, solubility changes upon fertilization, 245
— of fertilized and unfertilized

Arbacia eggs suspended in heavy water, uptake of deuterium into, 639
Prothrombin, thrombokinase, and accessory thromboplastin, fractionation of plasma globulin for, 67
Protoplasmic motion, aspects, 519
Pyrophosphatase, crystalline inorganic, isolated from bakers' yeast, 423
—, crystalline, ultracentrifuge, electrophoresis, and viscosity studies on, 451

RADIATION, ultraviolet and x-, and photorecovery, loci of action in egg and sperm of sea urchin *Arbacia punctulata*, 323
Radiations, ionizing, mechanism of action, cellular respiration, cell division, and, 865
Radioactive nitrogen labelling glycine, incorporation by avian erythrocytes and reticulocytes *in vitro*, 841
Respiration, cellular, cell division, and ionizing radiations, 865
Respirometry, microvolumetric, methods for measuring oxygen consumption and carbon dioxide production by cells and enzymic reactions, 375
Reticulocytes and erythrocytes, avian, incorporation of radioactive nitrogen-labelled glycine *in vitro* by, 841
Rhodopsin, bleaching, interplay of light and heat, 495
—, bleaching and synthesis, role of sulfhydryl groups, 797
Ribonucleic acid, bacterial, release, virus synthesis, virus liberation, and cellular lysis, relationship in bacteriophage formation in *Staphylococcus muscae* cultures, 409
— acid, desoxy-, ribonucleic acid, and protein synthesis in uninfected *Staphylococcus muscae* cultures, 741
— acid, desoxyribonucleic acid, and protein synthesis in uninfected *Staphylococcus muscae* cultures, 741
Roentgen ray and ultraviolet radiation and photorecovery, loci of action in egg and sperm of sea urchin *Arbacia punctulata*, 323
Root, spinal, of bullfrog, existence of gradient of sensitivity to sodium lack in, 183
—, ventral, electrotonus, after-currents, after-potentials, and excitability in spinal motoneurons, 289

SEA lamprey, *Petromyzon marinus*, hemoglobin, 45
— urchin *Arbacia punctulata*, egg and sperm, loci of action of ultraviolet and x-radiation and of photorecovery in, 323
— urchin eggs, solubility changes of proteins upon fertilization, 245
Sensitivity gradient to sodium lack, existence in spinal roots of bullfrog, 183
Silkworm, *Cecropia*, effects of diphtheria toxin on, 727
Slime mold, galvanotaxis, 1
Sodium, effect of ammonium and lithium ions upon frog nerve deprived of, 227
— ions, different external concentrations, equilibria of frog nerve with, 145
— lack in spinal roots of bullfrog, existence of gradient of sensitivity to, 183
— loss and recovery of excitability by normal and by degenerating nerves deprived of, 129
Sodium-deficient frog nerve, effect of cocaine, 203
Solubility changes of proteins in sea urchin eggs upon fertilization, 245
Sonic disintegration and T6-cyanide lysis of infected cells, growth of T3 studied by, 657
Spectra, fluorescence, of red algae,

and transfer of energy from phycoerythrin to phycocyanine and chlorophyll, 873
Sperm and egg of sea urchin *Arbacia punctulata*, loci of action of ultraviolet and x-radiation and of photorecovery in, 323
— nucleus, frog, analysis of inactivation by toluidine blue, 761
Spinal motoneurons, after-currents, after-potentials, excitability, and ventral root electrotonus in, 289
— motoneurons, electrical signs of impulse conduction in, 255
— roots of bullfrog, existence of gradient of sensitivity to sodium lack in, 183
Sporogenesis, nature in some aerobic bacteria, 907
Staphylococcus muscae cultures, bacteriophage formation, relationship between virus synthesis, release of bacterial ribonucleic acid, virus liberation, and cellular lysis, 409
— *muscae* cultures, bacteriophage formation, synthesis of ribonucleic acid, desoxyribonucleic acid, and protein in uninfected bacteria, 741
Sulfhydryl groups, role in bleaching and synthesis of rhodopsin, 797

TARSAL chemoreception, limiting mechanism, 55
Thrombokinase, prothrombin, and accessory thromboplastin, fractionation of plasma globulin for, 67
Thromboplastin, accessory, prothrombin, and thrombokinase, fractionation of plasma globulin for, 67
Tissues and blood, separation and assay of lysins and lysin-inhibitor complexes in, 361
Toad, *Bufo marinus*, parotid gland venom, adrenalin and hydroxytyramine in, 483
Tobacco mosaic virus biosynthesis, changes in non-protein nitrogen metabolism during, 847
Toluidine blue, analysis of inactivation of frog sperm nucleus by, 761
Toxin, diphtheria, effects on *Cecropia* silkworm, 727
Tyramine, hydroxy-, and adrenalin, in parotid gland venom of toad, *Bufo marinus*, 483

ULTRACENTRIFUGE, electrophoresis, and viscosity studies on crystalline pyrophosphatase, 451
Ultraviolet and x-radiation and photorecovery, loci of action in egg and sperm of sea urchin *Arbacia punctulata*, 323

VENOM, parotid gland, of toad, *Bufo marinus*, adrenalin and hydroxytyramine in, 483
Virus synthesis, release of bacterial ribonucleic acid, virus liberation, and cellular lysis, relation in bacteriophage formation in *Staphylococcus muscae* cultures, 409
—, tobacco mosaic, biosynthesis, changes in non-protein nitrogen metabolism during, 847
Virus-host system, *Bacillus mycoides* N, lysogenic and parent indicator strains, differences in appearance and rate of growth, 857
Viscosity, ultracentrifuge, and electrophoresis studies on crystalline pyrophosphatase, 451
Volumetric, micro-, respirometry, methods for measuring oxygen consumption and carbon dioxide production by cells and enzymic reactions, 375

WATER, heavy, uptake of deuterium into proteins of fertilized and unfertilized *Arbacia* eggs suspended in, 639

X-RAY. *See* Roentgen ray.

YEAST, bakers', crystalline inorganic pyrophosphatase isolated from, 423
